DETAILED ACTION

Response to Amendment

1. Claims 1-20, 24-26, and 35-92 have been cancelled; therefore, Claims 21-23, 27-34, and 93 are now pending in application 09/996,907.

Allowable Subject Matter

2. **Claims 21-23, 27-34, and 93 are allowed.**

3. The following is an examiner's statement of reasons for allowance:

4. As per **independent Claims 21, 27, and 93**, the prior art does not teach or suggest tracking the performance of said competition finalists *and one or more non-selected candidates; and determining an actual success indicator for each of said competition finalists and said non-selected candidates.*

5. **Corrie et al. (US 2002/0120538 A1)** discloses a system for evaluating and selecting competition winners from a pool of candidates in a competition comprising: a database for storing candidate documents (Para 0145, applications received and saved in grants management system); a grouping subsystem coupled to said database for grouping said candidate documents into candidate data sets (grouped by grant initiative); a qualification subsystem coupled to said database for determining said candidate data sets to be qualified or disqualified; a pool reduction subsystem coupled to said database for determining whether said candidate data sets having been qualified meet a discretionary eligibility standard (Para 0146-0148, review for application completeness and basic criteria and compliance); an evaluation subsystem coupled to said

qualification subsystem and said database for evaluating each of said candidate data sets having met said discretionary eligibility standard and scoring one or more evaluation variables in response to said evaluation (Para 0152, application reviewed); and a selection subsystem coupled to said evaluation subsystem and database for selecting one or more competition finalists responsive to said evaluation and scoring of said candidate data sets having met said discretionary eligibility standard (Para 0152-0154, system grants manager aggregates scores, ranks candidates, and selects winners).

6. Corrie fails to expressly disclose wherein said discretionary eligibility standard varies as a function of the number of said candidate data sets having been qualified.

7. However, Corrie does disclose the initial review of applications for basic criteria and compliance (Para 0148), and wherein the basic criteria are provided by each granting agency (Para 0148).

8. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have included wherein said discretionary eligibility standard varies as a function of the number of said candidate data sets having been qualified as part of the basic criteria provided by Corrie's granting agency, in order to increase the efficiency of the candidate selection system by allowing the granting agency and grants management system to control the size of the selection pool.

9. However, Corrie fails to teach or disclose tracking the performance of said competition finalists and one or more non-selected candidates; and determining an actual success indicator for each of said competition finalists and said non-selected candidates.

10. The remaining **dependent Claims 22, 23, and 28-34** are considered allowable, as they are dependent and based off of an allowable independent claim.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
